

Eco-Friendly CUSTOM LAZER COASTERS

FROM

eco·engravers

At Eco-Engravers we are committed to producing products that are inherently earth friendly. Our exclusive use of GrafixMat® is a classic example of this commitment. GrafixMat Coasters are manufactured with only the finest quality recycled cork and hardboard with a signature dual-layer construction process. Our one-of-a-kind cork mats combine utilitarian and aesthetic qualities in a product that is manufactured from environmentally efficient materials. Cork is the bark of a variety of oak tree from which the outer layer has been cyclically harvested for hundreds of years, without harm to the ancient trees. The GrafixMat surface material is made of cork derived from trimmings produced in wine cork manufacturing.
